It's the summer vacation and the Dork-hunters take a holiday on tropical Tortuga Island unaware that Fido (the Dork Commander) and Principal Jones (his second-in-command) have travelled to the same resort in their search for a buried treasure chest full of micro-galaxies.

The holiday turns to an adventure as the Dorkhunters are captured by pirate dorks and Sid is chased into the belly of a whale by a hungry sea monster, where he finds ghost pirates led by Captain Davy Jones for company, trapped there by a curse.

After escaping their captors the Dork-hunters book a return journey on a cruise liner, but their enjoyment is short-lived as Sid drops in on them accompanied by the Ghost Pirates. Fido and his Dork pirates are also on board with their captured treasure chest and a race follows to retrieve the micro-galaxies.

Will the Dorks hold on to the treasure chest? Will Captain Davy Jones and his ghastly, ghostly crew retrieve his ill-gotten booty or will the Dorkhunters successfully capture the chest and return the galaxies to a place of safety?
